

# TRAVEL SAFELY ON BOARD OUR SHIPS

The safety and well-being of our passengers are at the center of our concerns. Our teams have worked on the implementation of appropriate actions that respond to all the expected criteria.

A partnership has been reached with Bureau Veritas for the "SAFEGUARD" certification of our ships. This label will guarantee the correct application of the sanitary measures that will have been the object of a rigorous audit process and will attest to the complete training of our crews.

The steward supervises that the entire trip takes place in the best way on board. He is the ship's health reference and will ensure that all health measures are applied.

## TO EMBARK
